Usually delivered in 3 weeks? The final section details some stories of content

Armin Grunwald - - Science and Engineering Ethics 7 3 However, awareness of engineering practice pitfalls and an understanding of how they can be avoided is taught in very few schools at the present time, and for good reason.

Self-Deception in Research Misconduct The ethical decisions and moral values of an engineer need to be considered because the decisions of an engineer have an impact the products and services - how safe they are to use, the company and its shareholders who believe in the goodwill of the company, the public and the society who trusts the company regarding the benefits of the people, the law which cares about how legislation affects the profession and industry, the job and his moral responsibilities and about how the environment gets affected.
